

# Coating removal doesn't get any 'greener' than this

*Uses:*    **NO** chemicals    **NO** mechanical tools  
              **NO** abrasives    **NO** secondary media of any kind.

**Laser coating removal comes into the 21<sup>st</sup> century.**

- Non-contacting and non-intrusive
- Total waste product  $\leq$  the removed coating itself
- Can reduce total waste volume by over 95% compared to conventional methods
- Minimizes waste remediation and cost (in the case of hazardous waste)
- Minimizes environmental pollution
- Minimizes operator hazards
- Reveals substrate intact and unaltered (saving on subsequent processes)
