

# Torit® PowerCore™

## Changing the world of dust collection.

Innovative Torit PowerCore dust collectors combine award-winning PowerCore Filter Pacs with a new, patented oblique pulse system, delivering high filtration efficiencies not usually found in baghouse filtration.

The new Torit® PowerCore™ dust collection technology from Donaldson® Torit® outperforms every traditional baghouse collector – and does so in less space. In one extremely small but powerful package, the Torit PowerCore dust collector handles high airflow, high grain loading, challenging particulate, and fits in the smallest spaces. The filter changeout process is easy, quick and astoundingly clean compared to traditional filter bags.

**Smaller • Cleaner**  
**Easier • Cost-Effective**
