

# Batch Loaded *Airless Slurry Tumblast System*

**General Description:**

- Continuous belt high volume liquid abrasive wet blast system
- Timed blast and rinse cycles
- Reversible belt for unloading
- Dust free blasting and rinsing

**Applications:**

- One step corrosion removal and degreasing
- Descaling heat treated and forged parts
- Paint removal
- Deflashing

**Filtration:** Closed loop filtration provides filtered water for the rinse cycle. Filtration system removes broken down media and fine particles with each cycle and returns that water for the rinse cycle.

**Construction:** Cabinet is welded heavy gage stainless steel.

**Medias:** Stainless steel, ceramic, aluminum oxide, plastic.

Model WT3TB

Batch Loaded Parts

**Maintenance:** The system features a large full width maintenance door located at the rear of the cabinet in order to simplify access to the belt for replacement and the plumbing system. This includes Wet Technologies specially designed low maintenance slurry pumping system.

**Available Options:**

- Industrial oil and grease separation
- Heated rinse and/or slurry
- Self contained exhaust system
- Media Density Monitor
- Unload slide ramp

Model WT3TB	Capacity 3 Cubic Foot
Model WT6TB	Capacity 6 Cubic Foot

Larger Sizes Available On Request

*Spinner /Hanger, Rotary Table and Inline Conveyor Belt configurations also available*
