

Dawson-Macdonald Co. introduces the new Torit® Downflo® WorkStation

Remove fine air-borne contamination from work areas and recirculate clean air back. Ideal for those in-plant areas where dirty and/or noisy operations are out in the open: such as metalworking, woodworking, welding, grinding, sanding, chipping, batch mixing.

- **Flexible, modular, self-contained workstation.**
 - No restrictions to worker movement or visibility.
- **Unique “oval” Ultra-Web® high-performance cartridge design for maximum efficiency and filter life.**
 - Available in a variety of filter and after-filter types to meet most application specifications.
 - Easy filter access from front with no tools.
 - No hoods or ductwork required.
- **ExtraLife™ cartridge cleaning system needs only 50 psi air.**
- **Ledgeless design minimizes dust build-up inside the unit.**
- **Reversible Inlet Louvres can handle both welding fumes and grinding dust in the same enclosure.**
- **8 standard models available.**
 - Airflow capacity from 4,500 cfm to 22,000 cfm
 - Available with weld/acoustical/galvanized curtains to create any type of enclosure
- **10-year warranty**
