

Coating removal doesn't get any 'greener' than this

Uses: **NO** chemicals **NO** mechanical tools
 NO abrasives **NO** secondary media of any kind.

Laser coating removal comes into the 21st century.

- Non-contacting and non-intrusive
- Total waste product \leq the removed coating itself
- Can reduce total waste volume by over 95% compared to conventional methods
- Minimizes waste remediation and cost (in the case of hazardous waste)
- Minimizes environmental pollution
- Minimizes operator hazards
- Reveals substrate intact and unaltered (saving on subsequent processes)
