

How to keep your abrasive blast or shot peening operation running at full production, but at vastly lower cost....

Automation and/or abrasive media upgrade is the answer, and we can help with both. With over 80 years of experience in engineering, specifying, installing and servicing abrasive blast and shot peening systems, Dawson-Macdonald Co. is uniquely qualified to analyze your operation and make the most cost-effective suggestions, plus have the wherewithal to make it happen. In the economic climate we now find ourselves in, this type of service is more timely than ever.

A simple abrasive upgrade, which requires no equipment modifications, can save 30% or more in your blasting operating costs, which could easily translate into thousands or tens of thousands of dollars in savings per year. Let us show you how.

Similarly, adapting existing equipment with fully- or semi-automatic controls, or adding new automatic systems, can yield big gains in reduced overhead, increased production, increased quality, and increased operational efficiency. We have the answers.
