THE EASY DUCT ADVANTAGE

- Simple to install - No special tools or training required
- Clamp-together components can be taken apart and reused
- Flexible - Easily connects to existing ductwork
- Components and adapters fit every system
- Adjustable duct fittings simplify connections
- Smooth interior surface helps prevent clogs

EASY DUCT - AN INVESTMENT IN YOUR FUTURE

LOWER COST THAN CONVENTIONAL JOINING METHODS

Easy Duct™ clamp-together ducting eliminates rivets, screws, welds and other time-consuming and costly joining methods. The Easy Duct adjustable nipple also telescopes in length to eliminate the need for precise measurements and wasted parts due to improper measuring. Thanks to the patented Easy Duct design, straight piping, elbows and branch pieces clamp easily together in seconds and can be put together and taken apart with no special tools. That means you don't have to throw away your existing ducting each time you make a floor plan change.

LASER WELDED

- Smooth. No hang up interiors and virtually seamless exterior finish that allows fewer bug harbors and snag opportunities
- Stronger, air-tight longitudinal seams
- Rounder circumferences for easier clamping and tighter adjustable nipple seals

QUICK AND STRONG ASSEMBLY

The Easy Duct system begins with pipes and fittings (i.e. branches, elbows, pipes, hoods, and adapters from 3" to 24" in diameter) that have been machined so that each connecting end has double-rolled edges. When the Easy Duct clamp (complete with built-in gasket) is snapped into place, the resulting seal is strong and tight enough for almost all dust collection and solid materials conveying applications.

- Galvanized or stainless steel
- No welds - No rivets - No screws - No precise measurements required
- Your employees can handle many installations themselves
- Perfect for new installations or changes to existing systems
- Handles dusts, chemicals, food, fumes and more
- Clean outs and replacements are a snap
- Easy to take apart and reuse

DECREASED DOWNTIME

Thanks to the Easy Duct clamp together design, installations, clean outs and changes take only a fraction of the time it takes for traditional ducting. That means reduced down-time for your operations.

EFFECTIVE FOR NEW INSTALLATIONS AND EXISTING SYSTEMS

Many of the largest manufacturing facilities being built in the US today go online with complete Easy Duct systems. Easy Duct also connects easily to existing ducting systems. Because Easy Duct can be taken apart and reused, it quickly accommodates floor plan changes and machine replacements.

VERSATILE APPLICATIONS

A partial listing of materials collected or conveyed through Easy Duct includes: sawdust, metal grindings, printing powder, plastic pellets, dry cement, carbon black, smoke, fumes, grains, lime, wood chips, mists, toner dusts, paper trim, cocoa, and hundreds of others.

Call for a FREE analysis of how Easy Duct can cut your overall ducting and downtime costs.

EASY DUCT PIPE & FLANGED PIPE

PIPE PT. 3200

Laser Welded Seam with Rolled Ends. 3" is Lock Formed. Connects quickly and easily with the QF clamp.

FLANGED PIPE PT. 3201

Use this duct system for sizes above 24". Longitudinal lock form seam, with Van Stone Angle Flange on both ends

AUTOMATIC BLAST GATES

AUTO BLAST GATE 1-CYLINDER PT. 3245

SINGLE CYLINDER

AUTO BLAST GATE 2-CYLINDER PT. 3245

TWO CYLINDER

Gates are used as energy saving devices for industrial dust extraction where extraction is not always needed and where manual control needs to be eliminated. These are automatic energy saving blast gates operated by double-acting compressed air cylinders. Cylinders are controlled by electrically connected solenoid to machines or remote switch. Uses 120V control circuit and 75psi minimum air pressure.

DIVERTER VALVES

DIVERTER VALVE MANUAL PT. 3235

DIVERTER VALVE AUTOMATIC PT. 3236

Highly efficient, economical method of diverting flow of material or air. Manual or automatic operation. Constructed of heavy 3/16" thick and painted metal, with welded seams. Supplied with heavy duty flange bearings, and rubber seal in door. 45° angle uses 120V control and closes using 75 psi air pressure.

ORDERING NOTES: Data is subject to change without notice. Stainless steel components requiring flanges will be supplied with SS flanges unless otherwise specified. Stainless steel components are manufactured with 304 SS. [Call for 316 SS Prices]. For special parts or items to be custom manufactured call for quotation.

OIL MIST GASKET & O-RING

MOLDED RUBBER GASKET PT. 3190

Carefully place the gasket along the rolled edge of the part, being careful to avoid kinks or voids. Only one gasket is needed per joint. Join the gasketed end of the pipe to a non-gasketed end of the next part in the ducting run using a standard Easy Duct clamp. The oil-mist gasket, in addition to the gasket inside the Easy Duct clamp, provides dual protection against leakage.
Temp range -30°F to +225°F

NITRILE RUBBER O-RING PT. 3191

These materials work in conjunction with standard O-Ring. It does not replace it.
Position the larger-diameter standard Nordfab O-Ring above the oil-mist ring. The order should be as follows:
a) rolled edge or nipple; against
b) soft, small-diameter O-Ring; against
c) standard Nordfab O-Ring.

INSTALLING AN ADJUSTABLE NIPPLE

Instructions for using the “easy duct” adjustable nipple with rubber O-Ring for dry system. Each Easy Duct pipe section is 5’ in length. To shorten to accommodate an existing span, an adjustable nipple is used.

Measure distance to be spanned.

Mark distance to be spanned less 4”.

Use O-Ring provided and mark for cut.

Drill access hole then cut with saw

Cut piece of pipe put O-Ring on cut pipe, slide nipple over

Snap clamp over O-Ring and one end of nipple.

Finished connection using the adjust nipple assembly.

NOTE: KEEP CUT PIPE IN THE DIRECTION AS THE AIR FLOW.

ORDERING NOTES: Data is subject to change without notice. Stainless steel components requiring flanges will be supplied with SS flanges unless otherwise specified. Stainless steel components are manufactured with 304 SS. [Call for 316 SS Prices]. For special parts or items to be custom manufactured call for quotation.

SIZING BRANCHES

EXAMPLE: Always work from your machines back toward the filter. Suppose that you have a 5" drop that rises and runs back to join with a 6" drop as sketched above. What size branch will you need?

The 5" pipe carries 615 CFM at 4500 FPM, (See Chart). The 6" pipe will need 885 CFM at the same velocity (See Chart). Added together you have a total of $(615 + 885)$ 1500 CFM coming together. Looking again at the chart under 4500 FPM, you find that 1500 CFM is not listed, but falls very close to the 1570 CFM listed for an 8" pipe. This indicates that the 5" joined to the 6" will require an 8" pipe to carry all of the material at the right velocity. The branch, therefore, will be 8" on the downstream end reducing down to a 5" with a 6" branching off of it. That is listed as a 8-6-5 branch.

SIZING AN EASY DUCT SYSTEM

Easy Duct offers assistance to those salespeople and customers who have never designed a piping system. We can assist you in determining the correct pipe size and configuration that will supply you with the correct flow. Please call an inside Sales Representative for assistance.

USING THE CFM/FPM CHART

This chart allows you to choose the correct pipe size for the CFM that is required. Different materials need to be conveyed at different velocities to prevent the material from falling out of the air stream. For example, wood chips and saw dust flow well at 4500 feet per minute. Referring to the chart, a 4" pipe will convey 395 CFM at 4500 FPM. This indicates that a 4" pick-up on a machine will use 395 CFM from the filtering system. Or working in reverse, if you know that a machine will require approximately 400 CFM to remove the waste, then you should design a 4" pipe for the application.

CONDITION OF SALE

GENERAL CONDITIONS OF SALE

The terms and conditions of acceptance of sale set forth herein, and all drawings, specifications, descriptions and other documents attached hereto and incorporated here in by reference constitute the entire agreement between Easy Duct (seller) and the buyer. Seller's acceptance of his order is expressly conditioned by the buyer's consent to the terms contained herein. The terms and conditions of the seller's proposal (if any) and acknowledgment shall prevail over any conflicting or different terms in buyer's order unless buyer notifies seller in writing of its objections thereto within (15) fifteen days from receipt of seller's acknowledgment. The failure of Seller to object to any provision in conflict herewith whether contained in Buyer's purchase order or otherwise, shall not be construed as a waiver of the provisions hereof nor as an acceptance thereof. Seller's proposal is only preliminary unless it is otherwise confirmed. If any of the four terms and conditions of Seller's proposal conflict with these general conditions of sale, those contained in the proposal shall prevail.

WARRANTIES

The Seller warrants that the products sold hereunder conform to any applicable drawings and specifications accepted in writing by Seller and will be free from any defects in material and workmanship which become apparent under normal use, and of which Buyer gives written notice to Seller within a period of 6 months from the date of installation or 12 months from the date of shipment, whichever period first expires. If, within that period, the Seller receives from Buyer written notice of any alleged defect in or non-conformance of any product and if, in Seller's sole judgement, the product does not conform or is found to be defective in material or workmanship, then Buyer shall, at Seller's request, return the part or product F.O.B. Seller's shipping point and Seller at its option and expense, shall repair or replace the defective part or product or repay the Buyer the full price paid for such part or product by Buyer. Dismounting and reinstallation of defective or nonconforming parts is done at Buyer's expense. Warranty for delivery of spare parts or replacement for non-conforming parts expires when warranty for original equipment expires. Any repayment of purchase price shall be without interest. Seller's sole responsibility, and Buyer's exclusive remedy hereunder shall be limited to such repair, replacement, or repayment of the purchase price as above provided. There are no other warranties, expressed, statutory or implied, including those of merchantability, quality or fitness for purpose, nor any affirmation of fact or representation which extends beyond the description on the face here of. The warranties of Seller do not cover and Seller makes no warranty with respect to:

- A) failures not reported to Seller within the warranty period specified above;
- B) failure or damage due to misapplication, abuse, improper installation or abnormal conditions of temperature, dirt or other corrosive matter;
- C) failures due to operation, either intentional or otherwise, above rated capacities or in an otherwise improper manner;
- D) products which have been in any way tampered with or altered by anyone other than an authorized representative of Seller;
- E) products damaged in shipment or otherwise without fault of Seller;
- F) expenses incurred by Buyer in an attempt to repair or rework any alleged defective product, and defects in material and workmanship which are attributable to drawings and specifications provided by Buyer.

CLAIMS FOR SHORTAGES

Any claim for loss, breakage (obvious or concealed) are Buyer's responsibility and should be made to the carrier immediately. Seller will render Buyer reasonable assistance in securing satisfactory adjustment of such claims. Any notices of shortages or other errors must be made in writing to Seller within 15 days after receipt of shipment. Failure to give such notice shall constitute unqualified acceptance and a waiver of all claims by Buyer. Risk of loss for damages to the products sold hereunder passes to Buyer upon delivery to the carrier regardless of who pays shipping costs.

LIMITATION OF LIABILITY

Seller's sole responsibility and Buyer's sole and exclusive remedy with respect to any breach of warranty or guarantee under this agreement shall be limited to repair, replacement or repayment of the purchase price at Seller's sole option. Seller's total responsibility and liability for any and all claims, damages of any nature, losses, liabilities or costs of corrective efforts, including but not limited to those relating to any warranty or guarantee arising out of or related to performance of this agreement or the products covered hereunder or the performance thereof shall not exceed the purchase price. In no event shall Seller be liable for any special, indirect, incidental or consequential damages of any character; including but not limited to, loss of use of productive facilities or equipment, lost profits, property damage, expense incurred in reliance on Seller's performance hereunder or lost production, whether suffered by Buyer or any third party. Seller disclaims all liability for any and all costs, claims, demands, charges, expenses or other damages, either direct or indirect, incident to all property damages arising out of any cause of action based on strict liability.

Industry-Leading Technology

- Advanced filtration technology for optimal performance
- Reduced energy consumption and cost of ownership
- Advanced design and testing capabilities

The Most Filters and Parts

- For every brand and style of collector
- Wide range of filtration media for any application
- 90,000 filters and parts in stock and ready to ship

Unparalleled Support

- Live technical specialists
- Comprehensive pre- and post-sale support
- 40 manufacturing plants and 14 distribution centers worldwide
