Wet Blast Finishing*

WT 36-3

Filtration options to match
your requirements

The New WT36-RP3 FORCE

Introducing another in a series of Wet Technologies innovations

The most important features and options from our legendary manual industrial grade systems incorporated into an affordable 36" square design.

FEATURES	Most common applications for small to medium sized parts
<ul style="list-style-type: none"> • Our proprietary high concentration pumping system— produces an even finish • Closed Loop filtered rinsing is STANDARD! • Dust free blasting and rinsing • Durable rotational molded corrosion proof cabinet • Available HEPA air management 	<ul style="list-style-type: none"> • Deburr and radius edges • Smoothing/ Reducing Ra values • Etch Prep for coatings and bonding • Light Remanufacturing and de-oiling • Cosmetic Finishing • De-rusting and De-oxidizing • Blending machining marks

Medias: Fine to coarse angular and spherical

Closed Loop Filtration system separates broken down media and particles with each cycle, and returns that water on-demand to the manual rinse gun AND pressurized window rinse.

Support: Backed by the best warranty, factory and distributor support available.

We also manufacture larger stainless steel manual and automatic systems

By Buying American from Wet Technologies, you are also backing our continued support of U.S. Veterans and we thank you!

Factory Options Start With:

- Push button media monitoring
- Heated slurry and rinse to aid in oil separation and cleaning
- Booster and HEPA to atmosphere exhaust systems
- Stainless Portable Turn Tables—18" and 24" with covers

Contact us or through our local distributor to schedule testing and provide a complete proposal. You can find a list on our website.
